WORK EXPERIENCE

SENIOR ASSOCIATE (Data Annotator) | INNODATA |

Sep 24 - Nov 24

- Annotated and processed over 300 books, extracting high-quality question-and-answer pairs for training large language models (LLMs).
- Enhanced the efficiency and accuracy of language model training by curating comprehensive datasets tailored to specific use cases.

SOFTWARE DEVELOPMENT INTERN | CELEBALTECH |

Jun 24 - Aug 24

- Collaborated with a team of developers to design and implement user-friendly web applications using React.js, enhancing the overall user experience and functionality.
- Gained hands-on experience in front-end and back-end development. Participated in project planning, execution, and testing phases.

PROJECTS

MAKE-MY-CV

- Developed a user-friendly web application, "Make My CV," that allows users to create professional resumes with ease. The application provides customizable templates and an intuitive interface for users to input their personal and professional information.
- Prioritized data security and integrity during the migration process. Streamlined the transition process, reducing downtime and manual effort.

CITY-SPHERE

- Developed a Java-based application to act as a digital guide, offering essential city information for tourists, students, and business professionals.
- Implemented Java programming with JavaFX for an intuitive GUI and MySQL for efficient data management and storage.
